KUHINJE ELEGANCE LINE/*ELEGANCE LINE KITCHEN*

Nova linija kuhinja odiše dizajnerskom elegancijom i svakodnevnom praktičnošću. Sistem elemenata inspirisan kuhinjama po meri, projektovan je tako da maksimalno iskoristi svaki prostor u kome se zatekne. Kombinacijom elemenata se pored tipičnih fortalnih i ugaonih kuhinja, mogu postići i dve dubine kod visećih kuhinjskih elemenata i dve visine kompletne kuhinje, na 220cm i na 255cm - tako da se znatno povećava njen ostavinski prostor. Pored novih elemenata u vidu nisa i vinarija, ova kuhinja omogućava izuzetno veliki broj kombinacija sa elementima širine 60cm i 80 cm. Uveden je novi drveni dekor - halifax hrast koji je rađen u sinkro pore tehnologiji, koja imitira relistične pore i strukturu drveta.

Posebno smo ponosni na nasu saradnju sa BLUM-om, koji je jedan od vodećih proizvođača okova i mehanizama u svetu. Svi mehanizmi i šarke su BLUM sa 25-o godišnjom garancijom.

ELEGANCE LINE PLAKARI / *ELEGANCE LINE WARDROBES*

Idealno rešenje koje pomiruje elegantnu dizajnersku formu i maksimalno iskorišćenje prostora. Unutrašnjost plakara je veoma praktično isplanirana i podeljena je na 3 dela. Fioke su postavljene unutar plakara na metalnim teleskopskim klizačima. Delovi za kačenje duže i kraće garderobe poseduju mobilnu garderobnu šipku od poliranog aluminijuma. Treća zona su pomerljive police koje omogućavaju različite kombinacije u rasporedu unutar plakara. Krila plakara se prave od univera u visokom sjaju, debljine 18mm, sa ukrutnim horizontalnim alu-sjaj lajsnama i Hettich kliznim mehanizmom sa soft-close dodatkom. Rukohvati su izrađeni od poliranog aluminijuma u visokom sjaju. Rasveta je opciona, led lampe se šrafe u plafon plakara i pale se na prekidač koji se dobija uz kupljeni set rasvete.

Krila se montiraju u fabrici što garantuje čvrstinu i stabilnost na duže staze. Rade se iz tri dela sa vertikalnim ukrutnim lajsnama čime je sprečeno krivljenje frontova tokom vremena. Zadržali smo proverni sistem nivelacije u 6 tačaka, jedino kod plakara AP 270 se visinski podesava u 8 tačaka zbog njegove dužine.

LAKA NIVELACIJA - Nivelacija poda ormara na 6 tačaka

Ispod poda ormara je ugrađeno 6 nogarića za lako besprekorno nivelisanje poda ormara. To je važno jer se u toku eksploatacije vrata veoma lako i beščujno otvaraju, a uz pomoć ugrađenog SlowMotion mehanizma, veoma lako i usporeno zatvaraju.

EASY LEVELING - Leveling the closet floor on 6 points
Below the wardrobe floor legs for easy leveling are installed. This is important for easy and silent door opening, and with the integrated Slow-Motion mechanism, very easy and slow closing.

AMERIČKI PLAKARI / SLIDING WARDROBES

This is an ideal solution satisfying both design sides - elegant form and the maximum utilization of the space available. Inner part of the wardrobe is carefully planned and divided into 3 parts. Drawers are placed inside on the system of metal telescopic sliders. Parts planned for stacking of longer and shorter cloth items are equipped with an extra hanger made of polished aluminium. The third zone consists of drawers providing various configuration options inside the wardrobe. Wardrobe fronts are made of high gloss chipboard, 18mm thick, with stabilizing horizontal alu-gloss battens and Hettich sliding mechanism with soft-close mechanism. Handles are made of polished aluminium in high gloss. Lighting is optional, led lamps can be placed into wardrobe ceiling, LED lamps switch is a part of lighting set bought.

Fronts are mounted in the factory that is guaranty of firmness and long-term stability. Fronts are made in three parts, with vertical stabilizing battens, preventing fronts from folding during time. We have preserved adjusting testing system in 6 points, with an exception of AP 270 wardrobe that is adjusted in height in 8 points for its length dimension.

For all lovers of classical beauty and timeless design forms, we have expanded our Rustik collection. You may be already familiar with our awarded and proven quality Rustic kitchens, that won the hearts and decorated many homes of our loyal customers.

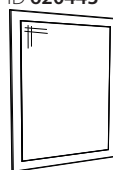

Now we are presenting our new Rustik hall units. Composed of five elements and designed in order to support and provide all necessary functions of hall furniture items. TV KOMODE/TV STANDS

Od pojave LCD televizora, teško je zamisliti dnevni boravak bez TV komode. TV komode su prilagođene specifičnim dimenzijama u kojima se izrađuju moderni televizori i pružaju savršen oslonac ovoj osetljivoj tehnologiji. Pored svoje osnovne upotrebe, TV komode su praktične i za odlaganje velikog broja predmeta koje želite da držite nadohvat ruke u dnevnom boravku.

Since the emergence of an LCD TV, it's hard to imagine a living room without a TV stand. TV stands are adapted to the specific dimensions in which modern TVs are made and provide the perfect support for this delicate technology. In addition to its basic use, TV stands are also convenient for storing a large number of items that you want to keep at your fingertips in the living room.

SPAVAĆE SOBE/*BEDROOMS*

Svaku prostoriju u stanu možete urediti po vašoj zamisli, ne robujući nikakvim strogo nametnutim pravilima. Ovo naročito važi za spavaću sobu koja treba potpuno da se prilagodi vašim potrebama i shvatanju lepog. Sa druge strane, postoje neke smernice ukoliko želite da sobu uredite u nekom od najčešće korišćenih stilova. U okviru tih smernica, možete slobodno eksperimentisati, ali njih treba imati na umu kao olakšicu u traženju pravog rešenja.

You can arrange every room in the apartment according to your idea, not be guided by strictly imposed rules. This is especially true for a bedroom that needs to be fully adapted to your needs and understanding of beauty. On the other hand, there are some guidelines if you want to arrange room in one of the most common used styles. Within these guidelines, you can freely experiment, but they should be kept in mind as a relief in finding the right solution.

NOVI MEHANIZAM

Uveden je novi mehanizam od nemačkog proizvođača Hettich. Ovaj sistem znatno ubrzava montažu vrata jer se veći točkići samo jednim potezom pozicionira na šinu. Osim toga, bez ikakvog šrafjenja, prilikom ispadanja klizača iz šine, korisnik može sam da vrati klizač na postojeću šinu.

DOKAZAN KVALITET - Nemački mehanizam sa aluminijumskim vodičama
Inovacija u upotrebi kliznih mehanizama. Jednim laganim klikom vraćate plakar u ležište, a da pritom ne brinete o dodatnom održavanju.

German mechanism with aluminium rail leaders.
Innovation in sliding mechanisms use. By one simple click you can pull the wardrobe doors back, without any additional maintenance needs.

NEW MECHANISM

We implemented new mechanism by german producer Hettich. This system is significantly improving efficiency of door mounting since the wheel is positioned on the sliding rail by one single step. Another advantage is that during eventual pulling out the wheel off the leading rail, user can easily mount the wheel back into the rail.

EKSCENTARVEZA - Veliki broj sklapanja i rasklapanja

Daje čvrstinu i stabilnost plakarima, kao i dodatnu sigurnost ukoliko se morate često seliti.

EXCENTER JOINT - Great number of mountings and dismountings
Provides firmness and stability for wardrobes, as well as additional safety if you are to move frequently.

100% UKLOPIVOST U SVE PROSTORE

Veliki broj elemenata različitih širina Vam omogućava slobodu da kreirate svoju idealnu kombinaciju, kao što je to slučaj sa plakarima izrađenim po meri.

Konstrukcija gornjeg klizača obezbeđuje sigurnost u eksploataciji da ne bi došlo do ispadanja frontova iz aluminijumskih vodica i dozvoljava eventualna odstupanja u horizontalnosti ormara do 8 mm.

The construction of the upper slide secures the usage, so it cannot happen for fronts (doors) to fall out from the aluminium leads and allows eventual horizontal deviations up to 8 mm.

NOVI MEHANIZAM - Bez problema i buke

Proizvođač mehanizma je unapredio sistem gornjih točkica. Umesto jednog većeg, sada postoje dva koja se rotiraju nezavisno jedan od drugog svaki na svoju površinu naleganja, pa u slučaju i da je šina malo deformisana, oni omogućavaju nesmetano kretanje vrata.

NEW MECHANISM - No problem - No noise

The mechanism producer has improved the system of upper wheels. Instead of one big wheel there are now two wheels which rotate independently from each other, so small deformities of the leading lines make possible the sliding of the doors.

LAKA NIVELACIJA - Nivelacija poda ormara na 6 nogara

Ispod poda ormara je ugrađeno 6 nogarića za lako besprekorno nivelisanje poda ormara. To je važno jer se u toku eksploatacije vrata veoma lako i beščujno otvaraju, a uz pomoć ugrađenog SlowMotion mehanizma, veoma lako i usporeno zatvaraju.

EASY LEVELING - Leveling the closet floor on 6 legs

Below the wardrobe floor 6 legs for easy leveling are installed. This is important for easy and silent door opening, and with the integrated Slow-Motion mechanism, very easy and slow closing.

Savremen način i ubrzan tempo života opterećen stresom, ostavlja nam sve manje vremena za odmor, što ozbiljno ugrožava naše zdravlje. Opšte karakteristike kreveta od drveta

General characteristics of solid wood beds

Proverite KVALITET FARBANJA

Kompletno automatizovana linija za farbanje i sušenje elemenata

Automatizovanje linije za farbanje osim velike produktivnosti donose kontinualan i visok nivo kvaliteta tretiranih elemenata.

CHECK OUR PAINTING SYSTEM

Completely automatized line for painting and drying elements

Automatizing the line for painting, apart from its high productivity, is providing continuity and high quality level of treated elements.

Čvrsta VEZA

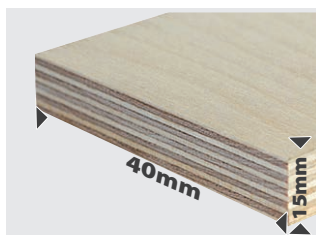

Metalni sistem spajanja stranica kreveta

Za razliku od sličnih proizvoda na tržištu, kod kojih se spajanje stranica kreveta vrši vijcima za drvo bez tiplova, naši kreveti imaju sigurne, posebno dizajnirane, skrivene metalne spojnice renomiranog italijanskog proizvođača, što uz drvene tiplove omogućava čvrst spoj i dugogodišnju stabilnost.

Strong CONNECTION

Metal system of bed side connecting

Unlike similar products on the market, where the connecting of the bed sides is done with bolts without anchor, our beds have secure, specially designed, hidden metal clips made by renown Italian manufacturer, which, together with wooden wedge enables tight connection and long-term stability.

Elastična i sigurna PODLOGA

Pod kreveta

Podloge od šperploče daju ravnu i stabilnu osnovu za dušek čime se obezbeđuje njegovo ravnomerno opterećenje. Time je omogućen zdrav i pravilan položaj kičmenog stuba i celog tela tokom odmora i sna. Razmaci između letvica omogućavaju dobru cirkulaciju vazduha oko duška i njegovo provetranje.

Well LINED

The bed with the beech laths floor

Lath floor of the bed gives a flat and stabile base for the mattress, thus providing its even loading. This enables a healthy and correct position of the spinal column and the whole body during rest and sleep. The spaces between the laths allow good air circulation around the mattress and its ventilation.

Siguran OSOLONAC

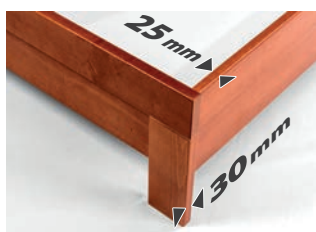

Savršena podloga za svaki dušek

Na srednju potpurnu letvu kreveta, na koju su vezane letvice, montirana su dva nogara za podešavanje visine, tako da se vrlo jednostavno i lako može dobiti savršeno ravna podloga za dušek, bez obzira na eventualne nedostatke poda na kome se krevet nalazi.

Strong SUPPORT

Perfect background for every mattress

At the middle of support rail on the bed, where laths are attached, we have mounted two legs, in order to allow height adjustment of the bed. This way, very simple and easily you get a perfectly flat surface for a mattress, regardless to the floes of the floor where the bed is located.

Život sa PRIRODOM

Srednji metalni oslonac za potpurnu gredu

Kreveti pravljani od punog bukovog drveta, osim što unose toplinu prirodnih materijala u vaš dom, postojani su i dugovečni. Bočne stranice izrađuju se od 25 mm, a čeonu stranu i nogari od 30 mm debljine drvenih ploča što daje posebnu stabilnost i čvrstinu.

Live with NATURE

Natural materials in your home

Beds made of beech wood, are bringing the warmth of natural materials to your home. They are stabile and long lasting. The sides of the bed are made of 25 mm, the side walls and the wooden trestles of 30 mm solid wood plate, which gives a special stability and firmness to the bed.

Ispod KREVETA

Lako dostupno i uvek čisto

Kako bi spavaća soba bila mesto zdravog odmora, veoma je važna mogućnost lakog čišćenja. Zato posebno ističemo da su svi WOODY kreveti nogarima odignuti od poda, koji je tako dostupan za održavanje

Under THE BED

Easy available and always clean

In order to have bedroom a healthy place to rest, it is very important that they are easily cleaned. Therefore we have especially emphasized that all "WOODY" beds are lifted on trestles, making the floor absolutely accessible for maintenance.

Dobro PAKOVANJE

Potpuna zaštita od oštećenja

Svi delovi Woody kreveti se pakuju u kartonske kutije. Uglovi i drugi delovi osjetljivi na oštećenja su dodatno obloženi i zaštićeni stiroporom, te je mogućnost bilo kakvog oštećenja pri transportu svedena na minimum.

Good PACKING

Complete protection from damage

All parts of "Woody" beds are packed in cardboard boxes. Edges and other parts susceptible to damaging are additionally coated and protected with Styrofoam, this way, the possibility of any damaging during transportation is reduced to minimal.

WOOD PREMIER

KREKET OD PUNOD DRVETA BUKVE/SOLID WOOD BEDS

Krevet Premier je novi krevet fabrike MatisWOOD koji u sebi pomiruje autentičan dizajn i visok kvalitet izrade u svom cenovnom rangu. Trudili smo se da Vam ponudimo autentičan dizajnerski proizvod po pristupačnoj ceni i kao takav, Premier je redak komad nameštaja na našem tržištu.

U upotrebi su ekološki ispravni lakovi i bajc premazi na vodenoj bazi, kao i kod svih naših kreveta od punog drveta. Podnicu čine letvice od šper ploče, oslonjene na uzdužnoj potpornoj srednjoj letvi koja se oslanja na dva dodatna nogarića sa štel šrafovim - čime je nivelacija kod neravnih podova dodatno olakšana. Prednja maska na uznožju i letvice za dušek su uračunate u cenu. Proizvodi se u dve dimenzije 90cm i 160cm. Fioka je ista kao kod Woody Basic kreveta i ima dvojaku namenu, za odlaganje stvari ili za pomoćni dušek.

Our bed PREMIER is new bed produced in our factory MatisWOOD successfully emphasizing an authentic design and high quality of production in its price range. Bed subconstruction floor is made of plywood laths, placed on horizontal supporting lath that is supported with two extra stands with steel screws- providing additional simplified adjustment in cases of floes of the floors. Front footer mask and mattress laths are included in price. Premier bed is produced in two dimensions, 90cm and 160cm. Bedstorage box is the same like in Woody Basic beds with double purpose, for an extra mattress or stacking items.

SIGURNOST

Središnji oslonac osim što ukrućuje krevet, koristan je i zbog bolje organizacije prostora u kutiji za odlaganje.

The central support, apart from strengthening a bed is also useful for better organization of the space in the storage box.

ZAobljene IVICE

Sasvim zaslužen i s ponosom, ovaj model kreveta nosi ime SOFT. Primenom softverskih 3D paketa za projektovanje, a potom izradom na kompjuterski upravljanim obradnim centrima i preciznom završnom obradom, osmišljen je krevet na kome su sve ivice zaobljene što, osim izražene estetike, donosi i jednu potpuno novu dimenziju komfora.

?????????

Completely deserved and proudly this model is named Soft bed. The application of 3D software package for design and then making the same bed on a computer-controlled machines with precise finishing we have designed a bed on which all edges are rounded, therefore besides expressed aesthetics there is an entirely new dimension of comfort.

I ŠTITI I ŠTEDI - Dvostruka vrednost prostora za posteljinu
Prostor predviđen za odlaganje posteljine hermetički je zatvoren i onemogućava upadanje prašine. Ovaj prostor, takođe i šteti prostor u spavaćoj sobi, jer vam za odlaganje posteljine nisu potrebne dodatne komode, a soba će uvek biti sređena i uredna.

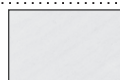

PROTECTS AND SAVES - Double space for bedding
The space provided for storage of bedding is closed hermetically, preventing the intrusion of dust. This space also saves the space in the bedroom itself, because there is no need for additional cabinets. The room will always be tidy and neat.

ČVRSTA VEZA - Metalni sistem spajanja stranica kreveta
Za razliku od sličnih proizvoda na tržištu, kod kojih se spajanje stranica kreveta vrši vijcima za drvo bez tiplova, naši kreveti imaju sigurne, posebno dizajnirane, skrivene metalne spojnice renomiranog italijanskog proizvođača, što uz drvene tiplove omogućava čvrst spoj i dugogodišnju stabilnost.

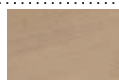

STRONG CONNECTION - Metal system of bed side connecting
Unlike similar products on the market, where the connecting of the bed sides is done with bolts without anchor, our beds have secure, specially designed, hidden metal clips made by renown Italian manufacturer, which, together with wooden wedge enables tight connection and long-term stability.

Ispod KREVETA - Lako dostupno i uvek čisto
Kako bi spavaća soba bila mesto zdravog odmora, veoma je važna mogućnost lakog čišćenja. Zato posebno ističemo da su svi WOODY kreveti nogarima odignuti od poda, koji je tako dostupan za održavanje

Under THE BED - Easy available and always clean
In order to have bedroom a healthy place to rest, it is very important that they are easily cleaned. Therefore we have especially emphasized that all "WOODY" beds are lifted on trestles, making the floor absolutely accessible for maintenance.

DEČIJE SOBE/*CHILDREN ROOMS*

Jedan od najvažnijih elemenata u odrastanju svakog deteta predstavlja i životni prostor u kome ono provodi vreme. Bitno je da ovaj prostor odgovara njegovim godinama i potrebama, ali i da oslikava detetovu ličnost na što bolji način i zadovoljava svu njegovu znatiželju, kao i potrebu za funkcionalnošću, koja je svakom mališanu potrebna.

One of the most important elements in the growth of every child is the living space in which it spends time. It is important that this space corresponds to his age and needs, but also to reflect the child's personality in the best way and satisfies all his curiosity, as well as the need for the functionality that every child needs.
